The Crimea and the Conferences.

The Foreign News by the last ..., like all which has preceded it for several months past, brings accounts of the continued inaction of the Allied troops before Sebastopol — we mean inaction so far as any demonstration towards an assault upon the place are concerned. They are active enough, and find quite enough for their hands to do, in repelling the incessant sorties and attacks of the Russians upon their advanced works. The latter generally lose the most men in these attacks, but in a majority of cases gain their object of destroying or damaging the besiegers' batteries; and as they appear to receive unrestricted supplies of men and munitions of war, a preponderance of loss is of no consequence to them. It must be acknowledged that the defence of Sebastopol has been conducted in a masterly manner—and that the place, if by any possibility it can be taken, will fall with honor to its defenders, and without having that moral effect upon the war which would have resulted from its capture by a coup de main—or even after a siege of moderate length. The defensive works of the place are stronger than when the siege commenced. A Paris paper says, that on the 13th of October last, the Redan tower had only sixty guns mounted, and that on the 10th of March, 1855, it showed two hundred; the Malakoff tower has seventy guns now instead of twenty-five, and the Flagstaff battery has one hundred and forty guns instead of the sixty which it presented at the commencement of the siege. In our view, there is little probability that the Allies can sufficiently weaken the works by the bombardment said to be pending to allow a successful assault. And if that assault is not made during the present month, all accounts concur in saying that it is not likely to be made at all. By the first of May, the heats of a Crimean summer will have bred a most pestilential atmosphere from the thousands of dead bodies, both animal and human, which are thinly buried beneath the soil. The Allied armies will not, it is believed, be able even to maintain their ground after that period, in the face of sickness and the greatly superior numbers of the Russians, who are constantly and largely reinforced, and with whom are the best officers and the best military talent of the Empire.—The fall of Sebastopol is now generally considered to be improbable even by the English papers, and the raising of the siege is freely advised in London. The grand expedition, which was heralded with such confident predictions six months ago, is at this moment well nigh a failure, if we may judge of the probable results from the spirit manifested by the Russians, from the resources of defence which they have at hand, and from the havoc which disease, January, February, and March have made in the ranks of the besiegers, with the prospect of more terrible assailants in General June, July, and August, if they remain to encounter them.

In view of this dubious condition of things in the Crimea, the English and French Plenipotentiaries at Vienna, have certainly very slight foundation to stand upon, when they demand hard or disgraceful conditions from Alexander, as a basis of peace. The moral effect of the contest has thus far been altogether on the side of Russia, although she has been of late mainly upon the defensive. The accounts from the conference accordingly show a willingness to relax somewhat from previous ... demands, under the "third point"— ... to the extent of permitting Russia to maintain in the Black Sea an equal naval force with England and France. This Russia would agree to, with the understanding that she should have ... with England and France, free access through the Dardanelles to the Mediterranean. Turkey, however, here interposes, with an objection, and demands the maintenance of the treaty of 1841, which excluded Russia from the straits —this exclusion being in the view of the Sublime Porte, indispensable to the safety and integrity of the Turkish Empire. The last minister stood at last accounts—waiting fresh instructions from St. Petersburg.

Shipbuilding is going on to some extent on the Penobscot, the present season notwithstanding the comparative depression in maritime business throughout the country. The price of ships, to be sure, is twenty-five or thirty per cent. lower than last year—but on the other hand the price of materials and the cost of building has, in many of the items, fallen fifty per cent. The greatest reduction is in the price of labor, which, (with the continued high rates of provisions) we fear is now unable to obtain living prices.

In passing down the river the other day, we noticed several large vessels on the stocks at Frankfort and Bucksport, and found at Belfast, that the keels of two ships of about 1200 tons each have just been laid—one by Messrs Carter and the other by Messrs White & Conner, and were informed that five or six large ships would probably be built there during the season, exclusive of a brig of three or four hundred ons nearly ready for launching, and another large craft partly built. Messrs White & Conner have nearly completed a new and excellent ship-yard, with all the modern improvements and conveniences—including a steam sawmill, planing machines, steam derricks, &c.— It will probably be the most complete establishment of the kind in the State. They have just received from the south, the timber for two ship frames of about a thousand tons each.

At this place, there are two or three vessels nearly completed on the Brewer side, having been commenced last fall; and several vessels of considerable size on the stocks at Crosby's yard.

The New Catholic Church.—The Journal states that the dimensions of the new Catholic Church were considerably exaggerated by the Mercury. The length of the building is to be 148 feet—width across the transepts 86 feet (the edifice to be in the form of the Latin cross) —and the height of the tower 196 feet.

The Attack upon Shanghae.—We are indebted to Capt. Robinson of this city for copies of the North China Herald of January 6 and 13, containing full accounts of the abortive attack upon the city of Shanghae, made by the French and the Imperialists on the 6th. It seems that there were engaged about 1800 Imperialists and 250 French marines from the men-of-war in port. The rebels, who have possession of the city, repulsed the attack after a four hours' contest—the French losing 45 in killed and wounded, and the Imperialists 400. About 3000 of the insurgents were concerned in the defence.

The Herald severely censures Admiral Laguerre for allying his forces with the Imperialists, and thus taking sides in the civil war now raging in China. It intimates that his course will prove highly prejudicial to the interests of all the foreign residents. The repulse of the French, it says, will operate to destroy that prestige which has ever attended the European arms in China.

The merits of the quarrel between the French Admiral and the rebels in Shanghae do not exactly appear—but the Herald seems to think that the Frenchman unjustifiably violated the neutrality before existing on the part of the Europeans.

On Thursday, the juries were dismissed until the third Tuesday of May, at which time there will be an adjourned session of the Court

The planting of trees is a delight to some persons, and is a duty of every good citizen who would contribute his share to the public improvement and the public taste. The favorable season for planting is at hand, and should be employed

On the subject of fruit trees, our columns may be deemed a good directory. Our advertising friends are posted up in all the excellencies and novelties of the sorts.

The recent importation of trees from France by Messrs J. W. Chapman & Co is said to be extensive, and of choice Fruits, and the trees of excellent quality.

The dealers in trees in our city are well supplied, and we trust that those of our citizens who have land and lots will make themselves busy in the purchase and planting of choice trees.

A California Strike.—We have received a copy of the "Columbia Clipper" Extra, printed in Tuolumne county, California—which is entirely filled up with the reports of various meetings of the miners—ten thousand of whom are on a "strike," against paying $6 per day per man, to the Tuolumne Water Co. for water from their canal. They are willing to pay $4 per day, but this offer being rejected, they have stopped working, organized for the protection of their claims, and are waiting the completion of another company of a new "canal" 24 miles long to the Stanislaus river, which was to be completed in 35 days. We notice the name of Capt. John A. Palmer, formerly of this city, as taking an active part in the meetings.

We observe that Mr Wingate our Street Commissioner, having given most of the streets a thorough spring cleaning, is now actively engaged in paving the drains in some sections, with the stones which are removed from the old Burying Ground Hill by the railroad contractors, and which the city, by agreement, is allowed to take, free of charge, *so long as they last*. They are worth one dollar a ton for paving purposes, and must be taken while they are going.

Munificent Contribution.—The New York Courier and Enquirer states that at a recent Sabbath contribution to the funds of St. Luke's Hospital, made at the Church of the Holy Communion, a roll of five *one thousand dollar bills* was dropped into the plate so quietly that the gentleman who received them knew not from whom they came.

A Total Eclipse of the Moon, will take place on Tuesday and Wednesday evenings next, May 1st and 2d, visible in the latitude as follows: Commences 9,38 P. M.—total eclipse begins 0,41 A. M. Total eclipse ends 19 minutes after midnight—eclipse ends 1,22 A. M. meantime. The last total eclipse of the moon, visible in this country, occurred on the sixth of January, 1852.

One of the finest luxuries of the season is to be found in fresh parsnips sliced lengthwise and fried slowly to a golden brown. Some persons prefer to have them boiled, before being fried, but at the Astor House, where this dish is esteemed as a luxury, the parsnip is sliced when raw and then fried.

Godey's Lady's Book, for May, is received. It contains ten full plate engravings, and 100 pages of reading matter—41 engravings in all. The Book has a rich variety of matter this month—both interesting and useful.

By some accident, we received no boat papers on Wednesday, and were consequently without the California news yesterday. The intelligence, however, was not of great importance.

A despatch to Boston of Wednesday forenoon, states that the large steam cotton factory at Portsmouth was then on fire, but there were hopes of saving the building.

Accounts from Montreal state that nearly the whole of the township of Tilden, in Canada West, has been burnt by fire.

Insurance.

Mr Editor: It is perhaps well known that Insurance Companies have been unwilling to insure steam or other saw mills situated in a section where the timber has all been cut and manufactured. The same prudence and care seems now to turn their attention to another class of property which by the late laws is deemed extra hazardous, as will be seen by an extract from a circular sent by an office out of the State to their agent in this City which reads as follows:

"In all places where the Maine Law, as it is called, is in force, or likely to be adopted, abstain entirely from the insurance of country taverns and barns, take only those pub ic houses that are handsomely supported by travel without being dependent on the bar-room

In like manner abstain from the insurance of liquors simply, wherever stored" Z.

Orange Plum.

Mr. Editor: The description and outline in "Downing's Fruits and Fruit trees" do not prove correct. I purchased trees of Mr. Downing of this variety, in 1848, which have fruited for several years. They prove very nearly the size and flavor of the Washington. Their color is an orange yellow, with a beautiful red cheek next the sun, and is a very handsome plum, and of a rich sweet flavor, and I would rank it at least as "very good."

The outline in Downing, would better give the form of Haling's superb plum, than the orange, which was a new fruit when this excellent work was published.

Cole, in his work, has done great injustice to the Sops of Wine or Bell's Early Apple, for with us in Maine it is one of our best early apples— It requires a very *rich* soil to bring it to perfection.

Bangor April, 1855

We were visited with a smart South-east rain storm, yesterday (Thursday) afternoon About six o'clock there were several vivid flashes of lightning with heavy thunder.

There is to be a ball May day night at Orono, at the Stillwater Exchange Hotel. Clarke's Quadrille Band from Bangor will discourse music on the occasion.—*Mercury*.

We are indebted to Edwards & Co's Express and to Artemas Egery, Esq., for late Boston papers.

A Week Later from California.

The steamship George Law, from Aspinwall, arrived at New York, 24th, with dates from San Francisco to March 31.

The George Law brings 272 passengers, and $772,000 in treasure.

The Panama Railroad was in fine order, and the health of the Isthmus good

The U. S. sloop of-war Falmouth was at Aspinwall, to sail on the 10th for Havana.

Trade was very dull and depressed, and money continued very tight.

Page, Bacon & Co resumed business on the 29th, and the deposits exceeded the money drawn out by nearly $100,000.

The condition of the other banks remains unchanged

Dr. Wright's friends were making strenuous efforts to place him in a condition to resume.

The Legislature was expected to adjourn about the middle of April

A prohibitory liquor law had passed the Assembly. Its provisions were not very stringent, and wine from California grapes was excepted from its prohibition.

An anti-gambling law had passed the Senate.

The news of the confirmation of Col. Fremont's Mariposa claim by the Supreme Court caused considerable rejoicing among the law claimants.

The proposition to fund the floating debt at San Francisco had been considerably discussed, and met with much opposition.

The sloop of war St Mary's had been ordered to San Juan Del Sud, to settle some difficulties, and another Greytown affair was deemed probable

Col. Walker's expedition to Nicaragua had not sailed, and it was quite doubtful if it had left California at all.

All efforts to discover the whereabouts of Sandford, the forger, had proved unavailing

The Steamship Golden Gate, with the passengers who left New York on the 5th of March, arrived at San Francisco on the 28th.

The weather had been glorious, and the crops promised an abundant harvest.

The miners are generally reported to be doing well, although the excitement, regarding the new Kern River mines had subsided

The arrivals of gold at San Francisco continue to be retarded by the scarcity of coin to purchase it.

Sherry, Janes & M'Crea, a recently established jobbing house in San Francisco, have failed for $100,000.

The San Francisco Herald publishes a letter purporting to have been written by Henry Meigs, from Talcahuano, Chili, affecting the utmost astonishment at the charges made against him. He says no living soul besides himself knew the cause of his leaving.

The Alta California of March 24th says: We are enabled to state, on reliable authority, that the most serious difficulties are apprehended in relation to a controversy between our Minister and the Nicaragua government, and that active measures are in preparation to redress the grievances, an account of which has been received here in despatches from our Minister. These despatches were addressed to Commodore Delancy, and contained the request that some government vessel on this station should be despatched to San Juan del Sud, Nicaragua, for the protection of American citizens there, and the redress of various outrages on our national flag. These despatches were opened by Commander Farragut, who took the responsibility of doing so, as the senior officer on this station. We understand that in consequence of these despatches, the United States sloop-of-war St. Marys is to be put to sea, as soon as she can be got ready, under secret orders, for San Juan del Sud.

Sales of Vessels.—Ship Miles Standish, 1090 tons, built at Richmond, Me., by Foster & McFarland, has been purchased by George B. Upton, Esq., of this city, and Capt. E. Caldwell for $49,600

Ship Uriel, of this port, 799 tons, has been sold for $30,000.

Horatio Harris & Co. sold at auction, at noon to-day, sch. Tioga, 215 tons, for $2300; A. L. Totten, 64 tons, $575; and sch. Angelina, 56 tons, for $460—all cash.—*Boston Transcript*.

Fire in Letter D. The dwelling house of Mr. Otis Eastman, of Letter D, was entirely destroyed by fire, about noon on the 11th ult., together with the furniture, clothing and nearly all the bedding of the family; also a considerable quantity of provisions, seed, &c. stored therein. The loss of provisions and seed at this season of the year is particularly unfortunate. The whole loss cannot fall short of $1000, on which there was no insurance.—*Ms. Farmer*.

An egg was laid by a native hen at Westbrook, near Morrill's corner, on the farm of Mr Stephen Knight, 'bigly—size' by ... inches —weight about ounces. Beat that, Shanghais! [illegible]

Daring Burglary. A most daring burglary took place last night, at No 109 Leverett St. occupied by Mr Lewis and another family. It appears that a burglar entered the house, and after visiting the rooms of three young men, taking their wallets, and fastening their doors upon them, entered a room occupied by an elderly lady, and going to her couch, seized her by the throat, telling her to lay still or he would kill her, at the same time brandishing a large knife over her head, and demanding money. The lady told him she had no money. The villain then renewed his threat of violence in case any noise was made, and then entered a chamber occupied by a young lady about 18 years of age. He placed the blade of his large knife on her forehead, and threatened her instant death in case she made the least noise, and did not at once comply with his wishes.— The rascal placed his face so near to that of the lady, that she could keep quiet no longer,— She screamed, and instantly seized his whiskers with one hand, while with the other she caught hold of the knife which was instantly wrenched from her by the burglar, who escaped. The scream from the young lady induced the other female to give the alarm from the balustrade

The burglar had placed a few silver spoons in the kitchen, but, in his haste to depart, left them behind. The wallets belonging to the young men who were locked into their rooms, were found in the kitchen, robbed of their contents

The burglar obtained only about $20 and an overcoat.—*Boston Journal*.

A Dublin paper states that the inspectors of work houses in the parish of Kildare, Ireland, on account of the crowded state of said work-houses, have paid the passages of 229 paupers to America and they were to leave on the first of April for Boston or New York. The Marquis of Lanscowne was also to pay the passages of a large number of poor Irish, as he did in 1852.

Appointment.—Joseph H. Jordan, of Ellsworth, Maine has been appointed to a second class clerkship in the Sixth Auditor's Office, in the place of I. E. Boudenot, removed— Salary, $1,400 per annum.

Curious Incident.—While the barque Odd Fellow, of this port, was lying in the harbor of Havana, a swarm of bees settled on her deck, and there being a person on board who understood hiving the "critters" a box was obtained and they were carefully brought to this port.—*Portland Argus*.

A French Story.

The winding up of a romance in real life has recently taken place in the quasi ethereal world of Paris. Thus runs the story:

At a Court ball, some twenty years since a young officer of the French cavalry met and was charmed by a beautiful English girl. He obtained an introduction, and danced with her as often as he could, without challenging the remark of his Grace the young lady's papa. Our hero was handsome, amiable, witty, and in every way, a person to win the goodwill of the fair sex. He was of good family, and had the aristocratic *de* affixed to his name, although he could boast no patrimonial estate.

The young lady was of England's privileged class—both noble and wealthy. This, however, our lover did not know when first he bowed before the charms of beauty. Love begets love and won such are grateful, and the fair girl returned the young soldier's devotion. They met often—how or where I cannot say, but Paris is large, and English customs are convenient for young people. This was all charmingly agreeable, but unsatisfactory, for there was a flirtation with a serious intention affixed to it—marriage

At length our heroine discloses her wishes to her parents. They were horrified, *their* daughter marry a Frenchman, merely a lieutenant, a man without estate! It was not to be thought of. She listened to the decision in tears. A day's sadness passed, however, she finds nature's dictate and the strength which love gives. She boldly and firmly declares to her parents that she loves the young officer with her whole heart, and *him* alone will she marry. If they will not permit her to judge of her own happiness she can wait till she is of age, when the clergyman may marry them without parental leave

My Lord and my Lady are made conscious that their fair and gentle daughter has a will of her own, and also a patient determination to gratify that will. They come to parley, and enter into negotiations with the young people.

The lovers are to be separated two years—it shall not be considered an engagement—and the young lady shall receive the addresses of other suitors.

On the other hand, the lovers are permitted to correspond, and if they remain lovers at the end of two years, they shall marry with full consent and approbation

The young lady consoles her anxious lover with assurances that *her* love is unchanged, and that the two years absence, will only serve to prove their affection for each other, and endear them to one another still more

They part. The English party return home— During a month they exchange letters daily—and such letters! Of what length, and how full of forms of endearment! How poor language seemed to them!

But one day our fair heroine listened in vain for the postman's knock, so well known to every London! He came not. The next day passed, and the next—and no tidings and thus many days passed, and brought disappointment only. Weeks lengthened into months, and her hopes became faint. Then my Lady condoled with her daughter, upbraided the young soldier, and urged the acceptance of Lord ——— as a suitor for her hand. It was thus that a true English heart should resent an insult.

Three months more pass. Meanwhile the unhappy damsel writes letters and sends them in every possible way, in the hope of obtaining an explanation of this long silence. None comes. Doubt becomes conviction—she is deserted. She stifles her love in her heart, and pride comes to strengthen her self-respect. Having no longer a desire of her own, she yields to that of her mother. "My Lady, I will marry Lord ———, but since I have so decided, let me be married quickly."

It was done. Fifteen years pass by. Our heroine is a widow! Five years more, and "My Lady" lies ill unto death.

She calls her daughter to her bedside, and confesses that she has detained the letters of the young officer—that he had been faithful. The proofs of it were by hundreds in such a desk. "My Lady" dies. Our heroine seeks those letters of the lover of her youthful days, and finds heaps of his, and also those she had written, in the vain hope of obtaining an explanation of his silence.

Twenty years of disappointment were forgotten in reading the ardent expressions of affection and devotion which they breathed. She was young again and her heart had known no care—it was again the spring time of her life. She took these letters with her, and went to Paris.

She sought information of the Minister of War, of him who was lieutenant in the cavalry of 1831. The authorities replied that the lieutenant of that time was now again acting-General. The widow wrote to the General that she was at Paris and desired to see him. He obtained leave of absence and hastened to see the lady. All is explained, and our lovers are married. To be sure the General is no longer young; but his manners have the same charm, and his elegance and style lessen his apparent age. The lady carries her inadmissible 40 years as if they numbered but 30. The latter twenty years of their lives are likely to be happier than either of the first.

And so ends a real life romance, that is very like one in a story-book.

NEW DISCOVERY.

Brown's Compound for the Hair.

This superior Compound has been prepared with the greatest care, from the recipe of one of the first physicians in the country. It is decidedly preferable to any article of the kind which is before the public. Since its recent introduction, its advantages are acknowledged by the many who have used it. It is a SURE REMEDY FOR BALDNESS, a certain preventive of the hair falling off, and stimulates its growth and beauty. It can be safely relied on, and need only to be used to be approved. Warranted to give satisfaction.

New England Roofing Company,

MANUFACTURERS OF

WARRENS' IMPROVED

Fire and Water, Proof Composition Roofs,

Office—7 Liberty Square, Boston.

THIS Company would respectfully solicit the attention of Builders, Architects, Manufacturers, and the Public to this much approved system of Roofing, which has been very generally adopted in the cities of Buffalo, Cincinnati, Chicago, and St. Louis, and within the past year in Boston and vicinity, where it has given entire satisfaction. It is rapidly superseding the use of all other kinds of Roof, and is confidently offered to the Public, as a mode of Roofing unobjectionable in every important particular.

The materials employed are none of them subject to corrosion or rust, like the metals, nor will they expand and contract with the changes of temperature, like tin and iron, nor shrink in dry weather, and swell in damp, like shingles, and other wood coverings

It combines in a greater degree than any other Fire Proof Roof now in use, the valuable requisites of cheapness, durability, and security against both Fire and Water.

These Roofs require an inclination of not more than one inch to the foot, leaving it in good condition for a promenade for drying purposes and is of particular advantage to adjoining buildings in the event of Fire.

They are afforded at a much less price than any other Fire Proof Roof. The amount of material saved, and which would be used (by the old method) in raising the walls, and framing a steep Roof, still further reduces the cost of the building.

Another advantage gained, is the securing of rooms in the Upper Story, of the same dimensions and quite as commodious, as those in the lower part of the building. The expense of a Three Story building, with this improvement not being greater than that of a building of two stories with the pitched roof. There is a further saving in the cost of gutters.

These roofs are not affected by the jar of machinery—like those of Tin or Slate.

The Composition is so prepared that it is not affected by the extremes of heat or cold.

In case of injury from any cause whatever, the roof is so easily and quickly repaired.

For further information apply by applying at either of the Company's Offices.

General Agent for New England.

Radway's Regulators.

The Third Great Medical Discovery of Radway & Co.

ONE REGULATOR is sufficient to regulate the Bowels, Liver and Pancreas, and healthy discharge of their functions.

Two will insure a plentiful discharge from the Bowels, at a regular period of twenty-four hours.

Four to six will purify thoroughly all corrupt and accumulated humors from the blood in a short period.

Important to Those Who Take Pills.

Every one who reads the heart of these pills will find RADWAY'S REGULATOR the most pleasant, safe, and effectual cathartic ever offered to the World. Their operation is mild and natural. Purgatives, and Physicians of the Old School, will find in RADWAY'S REGULATORS a substitute for all the disagreeable Pills now in use.

Regulators vs. Pills.

We are continually asked, What is the difference between Radway's Regulators and other dry pills?

We answer that pills, as they are usually prepared and sold by different manufacturers and generally of two kinds—those which operate on the bowels directly, called purgative pills, and those which act on the secretions of the liver, and are called alterative or liver pills.

Regulators resemble pills merely in shape but differ in every other characteristic. They act not only on the bowels, but on the kidneys, pancreas, skin, lungs, &c., regulating each one, and giving tone and energy to the whole system. No pill can be made that will be an equal purgative pills do, they do not alter the functions of the organs, but only remove obstructions from them. Regulators do not change the secretions in their composition, they are Cathartics when used for a length of time. They are sugar coated, being enveloped in an elegant vegetable gelatine. Price 1 to 2 regulate, 5 to 6 purge—good for all cases.

As a Family Physic

RADWAY'S REGULATOR is the best working ointment, safe, mild and pleasant pill to use. They are a quick and certain cure for Piles, Constipation, Loss of Appetite, Costiveness, Indigestion, Loss of Complaint, Dysentery, Colic, Bilious Colic, Headaches, Nervousness, Melancholy, Diseases of the Bladder,

Female Complaints

Leucorrhœa, Fluor Albus, Whites, and Irregularities of all kinds,

Bilious Diseases,

Bile on the stomach, Bilious Cholic, Enlargement of the Spleen, and all Chronic Affections of the Liver and Kidneys.

R. R. R. REMEDIES are sold by druggists everywhere.

For great relief performed in a short time by R. R. Relief, see next weeks paper. R. R. R. Remedies set up at the interest they are above supplied their health relieving cheap and correct.

Railway's Regulators.

Railway's Regulators are most carefully prepared from extracts and gums of rare purity, spirits and the Chloride of Lime. They will act upon the Liver, Kidneys, Pancreas, the Salivary Glands and Nerves, in a powerful and effectual manner. THE REGULATORS will not be taken for any length of time without causing salivation, as no kind of debilitating effect will follow their operation, and a single purging, they act gradually upon the system, and impart strength to every nerve, as it and the fibres.

DR. J. H. SPENCER'S PULMONIC SYRUP,
For the Cure of Consumption.

THE proprietor of this valuable remedy himself, many years ago, fell into so low as to be given up by his physicians and friends, in the last stage of Consumption. With all hopes of ever getting well, and fled, he was strongly recommended to use a Syrup made from an old Indian receipt, which succeeded in effectually curing him. The result has astonished and long number of acquaintances, to the gratification of the proprietor, who has obtained a reputation never equalled in this section of the country. Creating, as this case did, a sensation second to that only of a miracle, Dr. Schenck was waited upon by many similarly afflicted, to whom he administered the syrup with the same beneficial results. In fact, such was the notoriety of this medicine, that gained public attention to it, and freely extended the hand of friendship as it were, to present to Dr. Schenck, both individually and to the public, and used up their exertions in its behalf.

No wonder a remedy operating from the system in the manner that the Pulmonic Syrup does—it produces a healthy action in the purest parts, by purifying them from disease. It promotes the expectoration, relieves the cough, and in a manner gets rid of the phlegm, and when at rest, discharged, it heals the opening and the breaking of the tubercles or abscess produces, and the lungs become sound and restores the healthy performance of the natural functions. It also soothes the irritation upon the lungs, and other organs, and it requires these parts to heal it. Simple as it may appear, it is the purpose, and does all this and in the speedy manner, as the cases all testify, that it continues to operate, without other assistance or change in diet.

In all Dr. Schenck's cases from Pennington New Jersey, to Philadelphia, and commenced the practice of his professions, where he soon acquired a reputation unrivalled by any, in curing a disease that in many of its stages is beyond human skill, and he has since the daily press and the world unanimously testible evidence of his success.

Both of his parents had died with Consumption, which appears to have been a hereditary disease with his father's family. All the brothers and sisters except one, died early of this disease, some of them, but the only brother, reaching the age of twenty.

How left nearly the last of his family, he naturally became alarm, as the other brothers were carried to the silent tomb by this fell destroyer.

VOLUNTARY TESTIMONY.

We, the subscribers, residents of Flemington, do hereby certify that we are well acquainted with Dr. J. H. Schenck. His case as under his treatment, such as we believe, for unusual and Pulmonary Consumption, under the operation of which he was confined to his bed for six months, and his friends gave him, and to all appearance was past recovery. How he now performs his business, and has been for a long time, and to all appearance has past recovery. How he now performs his business, and has been for a long time, and to all appearance has past recovery. How he now performs his business, and has been for a long time, and to all appearance has past recovery.

The Most Successful Remedy.

REV. WALTER CLARKE'S

Great European Cough Remedy,

—OR—

Universal Cough Mixture,

IS unquestionably the best remedy for Coughs and Chronic Pulmonary diseases ever discovered. Read the following testimonials, and remember they are all from persons of first rate respectability, and they all live in this State and can all bring Clergymen of unquestionable character to them—Read and judge for yourself in this case selected from a multitude of others.

From Dr. John Brown, Jr. of this City.

DEAR SIR.—I have made use of your European Cough Remedy for a cough with which I have been afflict of for some time, to my entire satisfaction, and have also employed it in my practice with the happiest results, and am fully convinced that it is one of the best medicines in use for what it is recommended.

MRS. HUNNEWELL, of Scarborough, had for two years and six months been afflicted with a most distressing cough, with explosive pressure of the lungs and other painful symptoms. During this time she had complete good physicians, and taken the advice of many of the popular Doctors with out experience any permanent benefit. Many nights she was obliged to sit up for hours, no lying at all to breath from down and her friends despaired of her recovery. Last June she was induced to try Rev. W. Clarke's Great European Cough Remedy, and after bottle, gratefully records the fact that she was entirely cured, and that the use of two bottles with out any other medicine whatever, completely restored her to health, which she continues to enjoy.

Mr. and Mrs. Hunnewell could themselves ready to answer all enquirers respecting the above extraordinary cure, and are satisfied that the European Cough Medicine is the best remedy known for Coughs and disorders of the Chest and Lungs and would thus recommend it to the afflicted

They also refer to that Mr. Watson, one of their neighbors, who was so reduced by his disease as to be confined to his bed. He was persuaded to try the European Cough Remedy, and has continued to use it until entirely restored to health.

Has made arrangements whereby on applications prepared and those noted by him, THIRTY DOLLARS (must all *in no case* be paid back by others), will be returned to him if the case of a failure to obtain a patent and the rejection. Caveats, Specifications, Assignments, and all necessary papers and drawings, for procuring patents in this and foreign countries prepared and advice rendered on legal and practical matters respecting inventions, and infringements of patents.

Inventors can not only here obtain their specifications on the most reasonable terms, but our several housewives of the experience of 20 years practice, an extensive library of legal and mechanical works, and correct accounts of patents granted in this and other countries, besides being solicitors in a journey to Washington, the usual delay there, as well as the person in trouble to attend to the business, and from that time be restored to all rights. A few bottles completed the cure, and he now desires to recommend the medicine to others, as he is fully assured that it is worthy of the utmost confidence.

The following has just been received from John Dwyer, Esq., agent for Patent, Md., dated Nov 8, 1855:

Dear Sir—You will recollect that when you were here I had a severe cough of three months standing, and tried all the cough medicines I could obtain without success. Your medicine has cured it. It has also cured many of my neighbors. Please send me some more made in the same way.

Yours, &c. JOHN DWYER.

Oliver F. Osborn, West Waterville, testifies to the extraordinary cure of a lady, who, to all appearance, was in the last stage of consumption, so that it was thought she could live but a short time. A single bottle cured her cough, and she speedily recovered. Mr. Oliver states that he knows another person who for a long time has been afflicted with the Pitch, with severe cough, &c., who was completely cured by two bottles of the Universal Cough Mixture.

The Most Successful Remedy.

REV. WALTER CLARKE'S

Great European Cough Remedy,

—OR—

Universal Cough Mixture,

IS unquestionably the best remedy for Coughs and Chronic Pulmonary diseases ever discovered. Read the following testimonials, and remember they are all from persons of first rate respectability, and they all live in this State and can all bring Clergymen of unquestionable character to them—Read and judge for yourself in this case selected from a multitude of others.

From Dr. John Brown, Jr. of this City.

DEAR SIR.—I have made use of your European Cough Remedy for a cough with which I have been afflict of for some time, to my entire satisfaction, and have also employed it in my practice with the happiest results, and am fully convinced that it is one of the best medicines in use for what it is recommended.

MRS. HUNNEWELL, of Scarborough, had for two years and six months been afflicted with a most distressing cough, with explosive pressure of the lungs and other painful symptoms. During this time she had complete good physicians, and taken the advice of many of the popular Doctors with out experience any permanent benefit. Many nights she was obliged to sit up for hours, no lying at all to breath from down and her friends despaired of her recovery. Last June she was induced to try Rev. W. Clarke's Great European Cough Remedy, and after bottle, gratefully records the fact that she was entirely cured, and that the use of two bottles with out any other medicine whatever, completely restored her to health, which she continues to enjoy.

Mr. and Mrs. Hunnewell could themselves ready to answer all enquirers respecting the above extraordinary cure, and are satisfied that the European Cough Medicine is the best remedy known for Coughs and disorders of the Chest and Lungs and would thus recommend it to the afflicted

They also refer to that Mr. Watson, one of their neighbors, who was so reduced by his disease as to be confined to his bed. He was persuaded to try the European Cough Remedy, and has continued to use it until entirely restored to health.

Remarkable Cure of Influenza, with severe Cough, was effected by Mr. Brewster, Postmaster at Chase Corner, Aug. 20th, 1854. Rev. Walter Clarke, Pastor, Mr. Brewster's lady, Mrs. Angeline, Kennebec county, Maine, Judge Hathaway, Mr. Hughes, and others residing in the city, it being near the landing of all steamboats, and the centre of interesting business.

The bar will at all times be stocked with the choicest Wines, Liquors and Cigars that the market affords.

An excellent Livery Stable is attached to the House.

WADLEIGH HOUSE,

OLDTOWN, ME.

S. W. DUDLEY.

The above well known stand has been thoroughly overhauled and refurnished, and in all its appointments is the comfort of the way laying public has been consulted.

STANLEY HOUSE,

WATER STREET, AUGUSTA, ME.

G. W. RICKER, would respectfully announce to the Traveling Public that he has re-opened the Stanley House, Augusta, and furnished it throughout with NEW and FLEGANT FURNITURE, and has in every arrangement necessary to constituting it a First Class Hotel.

This is the most centrally located House in the city, being directly opposite the Depot, and in close proximity to the steamboat landing. The House, Post Office, and but a few minutes walk from the State House.

Business men, or persons traveling for pleasure, will find that this House affords every convenience for lodging that can be desired, and the Proprietor is determined to leave no pains to make it in every respect second to none in the State.

Hacks for all stages leaving town will be kept at this House.

In connection with the above are good Stables with attentive and careful Hostlers.

Eveleth House,

At Foot of Moosehead Lake,

GREENVILLE, ME.

W. H. CROSSMAN, formerly of the Waterville House, Waterville, and JOHN SHAW, former proprietor of the King House, Bath, would respectfully announce to the public, generally, that they have taken the above named new and convenient House, and furnished it throughout with substantial and elegant furniture, and are prepared to furnish the Traveling Public or Pleasure Parties, with better accommodations than can be found at most Hotels in large cities.

As a Summer Retreat

for Hunting, Fishing, Bathing, or to the lovers of beautiful Scenery, this House and location offers great attractions—as are probably than any in the State of Maine.

Persons travelling for business or pleasure will find at this House a table well supplied with the luxuries of the season, good Rooms, and every accommodation which can be desired.

Boarders are hoped, by strict attention to business, and be pains to every respect a good House, to receive a liberal share of patronage.
